DOCUMENT TYPE:	Utility		

(iv), when used, is always added last to the reaction mixture. Ingredients (i), (ii), and (iii) can be mixed in any order in the presence of the diolefin (v) which can be the same or different from the diene(s) to be polymerized. Preferably, the diolefin (v) is the same as at least one of the dienes being polymerized. Most preferably, the diolefin (v) is butadiene (usually 1,3-butadiene) or isoprene, and not a mixture of the two. Other diolefins which can be employed include polybutadiene, isoprene, polyisoprene, 1,3-cyclooctadiene, styrene, polystyrene, and styrene-butadiene rubber (SBR).
